ACGNJ Announcements

ACGNJ HAS AUGUST ACTIVITIES!
As you can see in the schedule on the right, some of our Special Interest Groups hold meetings in August. Have you been curious about one or more of those groups, but just haven't found the time to “drop in”? When you're not “riding the wild surf” or “catching some rays”, maybe you might consider attending a few. Have a great summer, full of fun, adventure and relaxation; and computer stuff too!

REMEMBER THESE DATES:
July 16, 2015 was the twenty-second anniversary of Slackware Linux, first released in 1993 by Patrick Volkerding. Slackware is the oldest surviving Linux distribution. (There are many Linux variants derived from Slackware).

August 16, 2015 is the twenty-second anniversary of Debian GNU/Linux, first released in 1993 by Ian Murdock. Debian is the second oldest surviving Linux distribution. (Ubuntu is based on Debian, as are many other “flavors” of Linux).

September 27, 2015 will be the THIRTY-SECOND anniversary of GNU (GNU’s Not Unix), first announced in 1983 by Richard Stallman. This is the true date of origin for the operating system that we now call Linux. (In its name, Debian GNU/Linux acknowledges its GNU “roots”. Slackware Linux, like most others, does not).

This newsletter was made by 100% pure Linux!
Operating System: Ubuntu 12.04 LTS
Desktop Publisher: Scribus 1.3.3.13
Word Processor: LibreOffice Writer 3.3.4

ACGNJ Meetings
For the very latest news on ACGNJ meetings, please visit the ACGNJ Website (www.acgnj.org).

For news from OTHER clubs, please go to: http://www.acgnj.org/joomla/

Lunics (Linux/UNIX): Monday, August 3, 8:00 PM
Andreas Meyer (lunics (at) acgnj.org)

Mobile Devices: Wednesday, August 12, 7:30 PM
Brenda Bell (mobdevsig (at) acgnj.org)

Investing: Thursday, August 13, 8:00 PM
Jim Cooper (jim (at) thecoopers.org)

NJ Gamers: Friday, August 14, 6:00 PM
Gregg McCarthy (greggmajestic (at) gmail.com)

Computer Workshop: Saturday, Aug. 15, 1:00 PM
Bob Hawes (bob.hawes (at) acgnj.org)

Java: (No meeting in August)
Mike Redlich (mike (at) redlich.net)

Web Browser: (No meeting in August)
David McRitchie (firefox (at) acgnj.org)

The following do not hold meetings in the summer: C/C++, Layman’s Forum, WebDev, Main Meeting,
Window Pains.

All meetings, unless otherwise noted, are at the Scotch Plains Rescue Squad, 1916 Bartle Ave, Scotch Plains, New Jersey. Directions and map on last page.

ACGNJ Reports

ACGNJ Investment Meeting Summary (July 9, 2015)

Philip Lees, ACGNJ

For July's meeting, 7/9/2015 we had 10 attendees. We asked members about their own trading software and their trading preferences. Telechart (v2007 and v12), Thinkorswim and TradeStation were the most popular, while there were also some older, more obscure preferences too. Everybody was involved (Jim C., John R., Sheena, George, Bob, Kathleen, Philip, John V., new attendees Jim L. and Martha, with new ideas discussed, there was great interaction and sharing of ideas. All in all, a fantastic meeting! Thanks to everybody who attended.

Please attend the meetings, everybody learns from them, and, if there are any "giveaways", you will be sure to get your own copy.

We hope to see you at August's meeting, 8/13/2015. Also, if you would like *any* trading topic to be discussed, please send an email to Jim. Or, if you would like to discuss *your* trading preferences, others would like to hear them too. Thank you.

Philip Lees

Java Users Group Report (June 9, 2015)

Mike Redlich, ACGNJ

There were a total of 8 attendees at our June meeting, entitled “Want es.next Now? Tracer Your Way Back to ES5 and Feel the Harmony,” presented by Ken Rimple of Chariot Solutions.

Ken discussed how to take advantage of the new features of ECMAScript 6 (ES6), which aren’t implemented in all browsers yet, and convert back to ES5 using various tools.

(Editor's Note: At first, I thought that the meeting title given by Mike above contained typos; but I double checked, and that actually is the way it's supposed to be).

Java Users Group Report (July 14, 2015)

Mike Redlich, ACGNJ

The month of July is reserved for a planning meeting to generate topics for September through June.

A number of topics were discussed including topics that weren’t scheduled from last year. We would like to invite speakers such as Yakov Fain and Elliott Rusty Harold who have given presentations at the Java Users Group in the past.

Topics for September, October, and November have been confirmed. They are as follows:

September 8: Technical Overview of Google Polymer - presented by Bill Brutzman.
October 13: Technical Overview of Rust - presented by Paulmichael Blasucci of Quicken Loans.
November 10: Technical Overview of Amazon Echo - presented by Barry Burd.

There were a total of 5 attendees.

Computer Workshop Report

Bob Hawes, ACGNJ

We had a total of two attendees at our July 11\textsuperscript{th}, 2015 meeting. Here, I should be frank and admit that the second person was an unexpected drop-in. After I helped him with his problem as best I could, he left. So he didn't stay very long; but be was an attendee. Therefore, I'm still counting him. I spent most of the meeting reading computer books. (So at least I learned something).

Top Ten Programming Languages

Bruce Arnold, ACGNJ

Bruce sent us the following link in an e-mail. It's certainly interesting enough, so we're using it here to fill an unplanned empty spot:

Even More Changes To My Skeleton

Bob Hawes, ACGNJ

By rights, this information should have been included in Still Too Big??? (Part 5) The Wrap Up, my article in our July 2015 issue. Except for two circumstances. First: At more than 3,800 words, Part 5 was already much “Too Big”. Second: My deadline was approaching, and I hadn't even started writing this stuff yet. However, I wanted this information to be referenced in that article. (Otherwise, it wouldn't have been a complete “wrap up”, would it?) So I added a silly paragraph at the end, directing readers to go to this article, and mentioning time travel. Now, at least, anyone reading only Part 5 will know that this additional information exists here. (All I still have to do is actually write it).

So let's get typing. My Starters subdirectory contains files that I'm likely to need each time I start a new newsletter. Currently, fourteen of its files are images; but that's only because I've just deleted a lot of previous “leftover” images that were no longer required for 1508SKL3.SLA, my latest “skeleton” file. To explain what's still there, I “flipped a mental coin”, and decided to start at the back and work my way forward.

I've only used APCUG_L1.JPG and SP_MAP1.JPG (the two images on page 16) since January of 2015, so they had never been reduced in size during the Still Too Big??? project. I made them by using the GIMP (GNU Image Manipulation Program) to cut them out of 1108page16-150.jpg, the giant full-page-size image that I'd previously been using for all of page 16. However, the filenames that I gave them at the time were NOT in the good old DOS 8.3 format. (Horrors!) So I renamed them as above for all future use.

I did the same for MEM_APP1.JPG, the membership application at the bottom of page 15. As that image will almost certainly be replaced by a text-only version in the future, we'll just make a note of its presence here and move on. The other two images on page 15 (TShirtF4r.JPG and TShirtR4r.JPG) were both reduced to one twentieth of their original sizes in Still Too Big??? (Part 3). That's what the lower case r added to each name means. Unfortunately, that new ninth letter means that I've now got to eliminate one of the other letters. Since I'd already used an uppercase R to indicate the “rear” view, I decided to change the lowercase r in each filename to an uppercase S (for “shrunken”), but that still left me with too many letters.

Fortunately, when I checked out the “4” in each filename, I made a pleasant discovery. I'd first used the T-Shirt advertisement in our October 2013 issue. There, the images used were TShirtF2.JPG and TShirtR2.JPG. In the very next issue (November 2013) the images used were TShirtF4.JPG and TShirtR4.JPG. That rapid numerical increase means that those numbers were not primarily image identification numbers. Instead, they were “generation saver” numbers that I'd been using while editing those images with the GIMP. They were only made so that if something went dreadfully, horribly, and terribly wrong, I wouldn't lose all of my previous work.

As you can see, I never used the “1” versions at all, and I only used the “2” versions once. (Apparently, I wasn't very satisfied with one or both of them). Then, I didn't use the “3” versions at all, either; but I've stuck with the “4” versions ever since. In short, neither “4” in those filenames means very much any more. So I can do OK without them. Therefore, I renamed those two files TSHIRTFS.JPG and TSHIRTRS.JPG. I created NL_CD_15.jpg (the image in our CD advertisement on page 14) when I was working on 1503SKL3.sla. (My previous “skeleton” file). Technically, it has been reduced in size, because my first two attempts to make it each came out “Too Big”. However, neither of those first two tries were saved or preserved. So there's nothing that this latest version needs to be differentiated from. Therefore, I just renamed it properly as NL_CD_15.JPG. (And shame on me for not doing this sooner).

Now, we skip all the way to our front page. Technically, there are only two images on page 1. The first is TINY_PC2.JPG. In Still Too Big??? (Part
3), my article in our May 2015 issue, I reported that as I was processing our October 2014 issue, I reduced it to one quarter size, got a slightly blurry result, but decided to use it in anyway. After that, though, I decided not to use that shrunken version ever again. So I didn't save it. That leaves just one more image to go. So you'd think we were almost done. Think again. There may be only one empty image frame left on page 1 (for our ACGNJ logo); but at the moment, we've got seven candidates standing in line to fill it. They are: 
ACGNJ3RC.JPG (134.3 KB, or 137,565 bytes) 
ACGNJ3WC.JPG (108.1 KB, or 110,653 bytes) 
ACGNJ4R.JPG (103.4 KB, or 105,848 bytes) 
ACGNJ4BW.JPG (85.0 KB, or 87,055 bytes) 
ACGNJ3RCr.JPG (28.1 KB, or 28,825 bytes) 
ACGNJ3WCr.JPG (30.0 KB, or 30,758 bytes) 
ACGNJ4Rr.JPG (9.1 KB, or 9,287 bytes) 
Those first four logos are the old unshrunken versions, so we won't be using them any more. Of the remaining three (shrunken) files, the first two look to be about the right size, but the third is too small. Furthermore, there should be a fourth shrunken logo, but it just isn't there. Also, the numbers in those filenames are, in this case, image identifiers. So we definitely need to keep them. The historical information reproduced below comes from two sources: ACGNJ Logo History (John Raff's article in our October 2013 issue) and Logo Mania (my article in our November 2012 issue).

In ACGNJ Logo History, John described how he made the logo that we initially used in our newsletter. (Please read that article for further details). Immediately following John's article, I added two logo images and some descriptive text. About Figure 1a, I said; “This is a screen shot of the very first ACGNJ logo to be used on our newsletter's front page (from the December 1996 issue). It's name is SS9612-G.png. (The G is for “Good”). It's the closest that I (Bob) could get to reproducing John's original logo”. I got Figure 1b from Logo Mania. We'll get to that in a minute. About Figure 2, I said; “This is acgnj2.png. It's used at the top of most of the pages on our club website”.

Next, we have to switch to Logo Mania. It's first page contains five logo images. The first is a very old website logo, which is not relevant to this article. I used the second image for Figure 1b, and the third image is another copy of Figure 2, so I've already used it above. (The fourth and fifth images are VERY similar to Figures 4a and 4b below. Please ignore them for the moment). I found Figure 1b in the same subdirectory on our website that contained Figure 2. It's name is acgnj-1.gif, and I noticed that it was similar to Figure 1a (especially after March of 2002, when it switched to a red background), except that Figure 1b doesn't contain the copyright symbol on the left.

Now we begin to see a pattern in our numbers: Series 1 is made up of Figure 1a and Figure 1b. (Actually, each of its members does have a “1” in its name: acgnj-1.gif and SS9612-G.png, though I'll admit that counting that second “1” is a bit of a stretch). Whereas series 2 has only one member (Figure 2), and its name is acgnj2.png. (However, as
far as I know, acgnj2.png was never used on a newsletter's front page). Following current newsletter policy, I converted those three files to JPG images before I included them in this article. (Figure 1a is a piece of club history, so it'll be preserved for the ages; but Figure 1b probably won’t be used again. Figure 2 probably won't be used again in a newsletter, either; but its original PNG version most definitely will continue to be used on our club website).

Next, we come to series 3. As you might expect, it's made up of ACGNJ logos with a “3” in their names. At one time, I did a whole lot of experimenting, so this series once had a whole lot of members (some with a C in their names, some without); but as of now, it only has two. The aforementioned ACGNJ3RCr.JPG and ACGNJ3WCr.JPG. (Although they won't be wearing those names for very much longer). They are quite similar, except for their background colors; and they each contain a copyright symbol.

A relatively long time ago, I used the GIMP to lift copyright symbol. Therefore, we don't actually have to put a C in their names to say this any more. Thus, here are the only series 3 logos (both renamed) that will travel forward with me into the future: (What? Did you think that I wouldn't stick in another mention of time travel if I got the chance?)

ACGNJ3RS.JPG (Figure 3a) 28.1 KB, or 28,825 bytes

ACGNJ3WS.JPG (Figure 3b) 30.0 KB, or 30,758 bytes (ACGNJ3RS.JPG has already been used on the front page of our January 2015 issue, before it was renamed from ACGNJ3RCr.JPG. Plus, because we printed out hard copies of our March 2015 issue in real ink on real live paper for the Trenton Computer Festival, ACGNJ3WS.JPG has already been used on the front page of that March newsletter, also before it was given its new name).

That brings us to series 4, which previously had only two members, ACGNJ4R.JPG and ACGNJ4BW.JPG. Actually, I made the red one back in 2008, when I wanted to include a tiny version of Figure 2 in some award certificates that I was designing. Unfortunately, the letters in that tiny version “bled” together, and it became illegible. So I used the GIMP on Figure 2, and simply moved all of the letters farther apart. Thus, I produced the expanded logo ACGNJ4R.PNG, which I used for the first time in a newsletter on the front page of End-Of-Year 2008 Supplement, the second “practice” ACGNJ newsletter that I made. (You'll find it in the 2000_09
directory of our Newsletter Collection CD, under the filename 2008_10S.PDF). In 2011, (when I knew that I would become the full time editor starting in 2012), I used the GIMP again to change the background color of that logo from red to white. I used that white version (ACGNJ4BW.PNG) on the front page of our April 2012 issue. (After May of 2013, when I adopted my **JPG images only** policy, I replaced both of those PNG logos with JPEG versions).

As mentioned above, the new shrunk replacement for 4R is **too** small, and the new shrunk replacement for 4BW doesn't as yet exist. Let's see if we can figure out how this happened. First: I only put a series 4 logo on my front page in even months; and of the ten newsletters that we reduced in 2015, only **five** of those months were even. Second: I only use the black and white logo versions when I intend to print an issue. We usually only do that for the Trenton Computer Festival; and ever since I became full-time editor, TCF has always been held in March. Third: I didn't try to shrink **every** logo. I shrunk them on a case by case basis, **only** if necessary. Fourth: In *Still Too Big??* (Part 3), I reported shrinking ACGNJ4R.JPG while working on our *October 2014* issue. At that time, I said: “I reduced it to one quarter size, and got an image that was still sharp. So I undid that Scale operation, and tried one **hundredth** of its size, and it was still usable. So I went with that one”.

(Also, in *Still Too Big??* (Part 4), I mentioned using that already shrunk image as I was processing our *February 2014* issue).

Taken together, my first, second and third points explain why a shrunk replacement for 4BW doesn't exist. (There just wasn't any reason for me to make it); and all by itself, my fourth point explains why the existing shrunk replacement for 4R came out **too** small. Fortunately, the solution to both problems was exactly the same: Make *new* ones for use in all future issues. So that's what I did, by reducing the original unshrunk series 4 logos by the same amount that I'd previously reduced the original unshrunk series 3 logos . (Also, to stick to the 8.3 format, I had to change the BW, for “black and white” to just W, for “white”). Thus, here are the **only** series 4 logos (both newly shrunk) that will be traveling forward with me into the future:

ACGNJ4RS.JPG (**Figure 4a**) 26.9 KB, or 27,526 bytes
ACGNJ4WS.JPG (**Figure 4b**) 27.3 KB, or 27,975 bytes

(I intend to put ACGNJ4RS.JPG on our newsletter's front page as soon as possible, hopefully in our August 2015 issue. Plus, just to “get it out there”, I intend to use ACGNJ4WS.JPG on our front page as well, possibly in October 2015, which will be our annual “Halloween Episode”).

It has just occurred to me that I might be causing some future problems for myself, by using the letters R and S in those JPG image filenames above. (For “red” or “rear”, and “shrunk”). That's because I'm **already** using those two letters in the PDF filenames on our Newsletter Collection CD. (For “reduced” or “replacement”, and “supplement”). However, I can't think of anything I can do to fix this situation right now. So I'll simply have to hope for the best, and move on.

As I write this, we've just passed 2,500 words. Therefore, if I **had** tried to add this information to *Still Too Big?? (Part 5) The Wrap Up*, that article would have come in at just over 6,300 words. Way, **way**, WAY “Too Big”! So I'd say it's a **good** thing that I didn't try.

See you next month. ☺
10 Tips for Online Shopping Safety

Sandy Berger, CompuKISS (www.compukiss.com) sandy (at) compukiss.com

Amazingly, in today's topsy-turvy world, because of vulnerabilities in the processing of credit and debit cards used at retail stores and the hackers who are focusing on those vulnerabilities, right now shopping online can actually be safer than swiping your card at a local store. For safety sake, however, there are a few online shopping rules that you should follow.

1. The first of these is to always have a good antivirus program installed on your computer and to update your antivirus program and other software like the operating system whenever an update is available. When in doubt, don't click on links. This is especially true of email where phishing schemes are prevalent, but you should also be careful when you are surfing the Web or visiting social media websites.

2. Shop at trusted, established websites. Don't use any sites that you've never heard of. If you want to try a new website, check to see if any friends or acquaintances have used it successfully.

3. Pay only through secure sites. Typically the address in your browser will change from "http:" to "https:" during a secure connection.

4. Never email your credit card number, social security number, or personal information to anyone. No reputable seller will request it by email since email is not secure.

5. Do your banking and shopping from home where you are on your own secure network. Wi-Fi hotspots at local coffee shops and other establishments usually do not offer enough protection unless the user takes some added precautions, which can be cumbersome for the average user.

6. Create strong passwords consisting of numbers, letters, and symbols. Do not use words or names. Make the password for each banking and shopping site unique. Keep your passwords private.

7. Credit cards are generally the safest option for shopping online. When using a credit card, you have limited liability and the ability to have the credit card company intervene if something goes awry. Debit cards can also be a good choice as long as you have investigated their liability limits, which may be higher than those of credit cards.

8. Keep a paper trail. Let's face it, none of us have perfect memories. Print and save records of your online transactions, including the name of the seller, product description, price, and date of purchase. Most reputable merchants allow you to print a receipt after the transaction is complete. You can use these printed receipts to compare to your bank and credit card statements.

9. Monitor your bank accounts and credit card purchases regularly. Report any discrepancies or unusual charges to your financial institution immediately.

10. Your social security number is the key to your identity. Be miserly about sharing it with anyone, especially online. No reputable merchant will ever ask for your social security number to make a purchase.

Credit card theft is pretty easy to get through. Usually you notify your financial institution and they issue you a new card. Identity theft is much more difficult to handle because a thief can open lines of credit in your name, buy a car, and obtain new credit cards. In order to steal your identity, the thief needs personal information like social security number, address, phone number and financial information. So be careful when giving out any such information.

Many financial experts say that having your bills sent to you electronically and paying them electronically is safer than sending and receiving them by mail. They also recommend shredding paper documents with personal information. So whether you use a credit card at a physical store, you shop and pay bills online, or you pay bills by mail, the key word is "caution." Our mothers taught us to watch our wallets and keep the doors closed. Now we have a lot more convenience, and also a lot more to watch out for.

SIG INFO

LUNICS (Linux/Unix)
Andreas Meyer (lunics (at) acgnj.org)
http://www.acgnj.org/groups/lunics.html

LUNICS is a group for those who share an interest in Unix and similar operating systems. While we do quite a bit with Linux, we’ve also been known to discuss Solaris and BSD as well. Recent meetings have followed a Random Access format. See our web page for further information. (We meet on the first Monday of each month, at 8:00 PM).

Main Meeting
Mike Redlich (president (at) acgnj.org)
http://www.acgnj.org/groups/mainmeet.html

We meet on the first Friday of the month, at 8:00 PM. Each December, this meeting includes our Annual Business Meeting and Officer Elections. No meetings in July or August.

Layman’s Forum
Matt Skoda (som359 (at) gmail.com)
http://www.acgnj.org/groups/laymans.html

This SIG discusses issues of interest to novice users or those planning to get started in computing. Watch our Web page for updates and announcements. We meet at the same time as the Hardware Workshop. (On the second Monday of the month, at 8:00 PM). No meetings in July and August.

Hardware Workshop
Mike Reagan (hardware (at) acgnj.org)

This group is dedicated to repairing, refurbishing and/or recycling older computers. Ten people attended the first meeting, so there is still a market for this type of event. Although we looked at some of the older equipment stored in his back room, most of our time was spent in talking about ast experiences and planning for the future. Hopefully, we can establish a viable long-term schedule of projects, and keep the interest of those who attended this inaugural meeting. If you have a hardware problem, bring it in and we can all help fix or demolish it. (No guarantees either way.) We meet at the same time as the Layman's Forum. (On the second Monday of each month, at 8:00 PM).

Java
Mike Redlich (mike (at) redlich.net)
http://www.redlich.net/javasig/javasig.html

This SIG covers beginner, intermediate, and advanced level Java programming. Primary focus is on developing useful/practical applets and applications. (We meet on the second Tuesday of each month, at 7:30 PM).

Mobile Devices
Brenda Bell (mobdevsig (at) acgnj.org)

The Mobile Devices SIG focuses largely on current-generation cellphones and smart phones (such as Blackberry, Android, iPhone) which bridge the gap between basic cell phones and traditional computers, and how they can help you manage and organize your life. Our membership ranges from those who have recently acquired their first, basic cellphone to those who develop applications for today’s modern smart phones, iPods, and ultra-portable computers. While we expect to spend much of our time investigating the built-in features and specialized applications available to modern smart phones, if you bring your basic (or multimedia) cell phone, iPod, or other mobile device with questions on how to use it, where to find applications, or what features they have, we are always happy to help! Meet and greet and plan where this event goes. Bring all your ideas, PDAs, fancy phones, etc. (We meet on the second Wednesday of alternate months (we get the even ones), at 7:30PM).

Computer Workshop
Bob Hawes (bob.hawes (at) acgnj.org)

ACGNJ has not held a daytime meeting in quite a while, so we’ve decided to try again. Our inspiration: The Philadelphia Area Computer Society holds only one meeting a month, but it’s a biggie. On the third Saturday, from 8:00 AM to 3:00 PM, they hold seventeen different meetings, four at a time in four different rooms. Apparently, there IS an audience for Saturday daytime meetings. We're starting smaller, though. Just one room (our usual) from 1:00 PM to 4:00 PM. We're calling it Computer Workshop, after the meetings that Burke Mawby held in Aberdeen,
NJ from 1989 to 2007. Our format (to start, anyway) will be random access. We meet on the Saturday immediately following the second Friday of the month. Most times, this is the second Saturday, but it can occasionally be the third Saturday. Please check the schedule on Page 1 to be sure.

**Investment Software**
Jim Cooper (jim (at) thecoopers.org)
http://www.acgnj.org/groups/sig_investment.html

The Investment SIG continues with presentations on how to use analysis programs TC2000 and TCNet. Large charts are presented on our pull down screen and illustrate the application of computer scans and formulas to find stocks for profitable investments. Technical analysis determines buy points, sell points and projected moves. Technical analysis can also be used on fundamentals such as earnings, sales growth, etc. We're no longer focusing on just Telechart. If you are using (or interested in) Tradestation, eSignal, VectorVest, or just in learning how to select and use charting and technical analysis, come join us!! (We meet on the second Thursday of the month, at 8 PM).

**NJ Gamers**
Gregg McCarthy (greggmajestic (at) gmail.com)
http://www.NJGamers.com
www.lanparty.com

The Friday Night Frag starts at 6:00 PM on the second Friday of each month, and keeps going until 12 Noon on Saturday - 18 hours for 5 bucks!
BYOC - Bring your own computer.
BYOF - Bring your own food.
And if you don't like sitting on metal folding chairs...BYO chair!

**Web Browser (Formerly Firefox)**
David McRitchie (firefox (at) acgnj.org).

This SIG is an open forum for all Firefox and Mozilla techniques and technologies, to encourage study and development of web sites of all kinds. All browsers will be considered and examined. All members and guests are invited to check out the design concepts and voice their opinion. (We meet on the third Monday of each month, at 7:30 PM).

**C/C++ Programming**
Bruce Arnold (barnold (at) ieee.org)
http://acgnj.barnold.us/index.html

This is a forum for discussion of programming in general, beginning and intermediate level C, C++, C-Win programming, hardware, algorithms, and operating systems. We demonstrate real programming in a non-intimidating way, presenting complete code for working programs in 3-5 sheets of paper. (We meet on the third Tuesday of each month, at 7:30 PM). No meetings in July or August.

**Window Pains**
John Raff (jraff (at) comcast.net)
http://www.acgnj.org/groups/winpains.html

Intended to provide members with Windows oriented discussions, Microsoft and Linux style. Directed to more technological level of attendee, but newbies are welcomed. (We meet on the third Friday of the month at 8:00 PM). No meetings in July or August.

**40th Anniversary Newsletter CD Now On Sale**
Beta .15 Release.
$8.00, including postage.
($7.00 if you pick up a copy at a meeting).
Get yours today!

**Back Issues Still Needed**
Our collection remains incomplete. Below is a list of missing newsletters. Anyone who lends us one of these (or supplies a good clear copy) will receive the next CD as our thanks.
1975: #2 and #3 (dates uncertain).
1976: January.
1984: August.
1985: June, July, August, September.
Guru Corner

If you need help with any of the technologies listed below, you can call on the person listed. Please be considerate and call before 10 PM.

## Directions to Meetings at Scotch Plains Rescue Squad, 1916 Bartle Ave., Scotch Plains NJ

**From New York City or Northern New Jersey**
Take Route 1&9 or the Garden State Parkway to US 22 Westbound.

**From Southern New Jersey**
Take Parkway north to Exit 135 (Clark). Stay on left of ramp, follow circle under Parkway. Bear right to Central Avenue; follow to Westfield and under RR overpass. Left at light to North Avenue; follow to light in Fanwood. Right on Martine (which becomes Park Ave). Right on Bartle Ave in middle of shopping district. Scotch Plains Rescue Squad (2-story brick) is located on the right. Do not park in the row next to the building. You’ll be towed.

**From I-78 (either direction)**
Take exit 41 (Scotch Plains); follow signs to US 22. Turn right at light at bottom of hill and use overpass to cross Rt. 22. Follow US 22 Westbound directions.

**From US 22 Westbound**
Exit at Park Avenue, Scotch Plains after McDonalds on the right, diagonally opposite Scotchwood Diner on the left, immediately before the overpass. After exiting, turn left at the light and use overpass to cross US 22. Bear right at bottom of ramp to continue to south on Park Avenue. Turn left at the second light (a staggered intersection). Scotch Plains Rescue Squad (2-story brick) is on the right. Do not park in the row next to the building - you’ll be towed. We meet on the second floor, entering by the door at the right front of the building.

**From Western New Jersey**
Take US 22 Eastbound to the Park Avenue exit. The exit is about a mile past Terrill Road and immediately past the overpass. Exit onto Park Avenue South and follow the directions above to the Rescue Squad building.
